

Coexisting with Coyotes

Keep Wildlife Wild

Never feed coyotes. Feeding them encourages bold behavior and puts both people and coyotes at risk.

Pet Safety

Keep cats indoors and dogs on leashes, especially at dawn and dusk. Secure outdoor pet food and water sources and do not use retractable leashes.

Keep Your Distance

If a coyote approaches too closely, make yourself big and make loud noises.

Secure Your Space

Remove attractants. (pet food, garbage, fallen fruit, etc.)

Respect Their Role

Coyotes help control rodent populations and maintain a balanced ecosystem. They've been thriving alongside humans for centuries!
